

Lifecycle Group: Capstone I

User Stories

ID	As a/an [user type]	I want to [do something]	So that [benefit]	Theme	Priority
1	Administrator	I want to assign a Student to a Team	So that I can assign that Team a Project	Team Management	1
2	Administrator	I want to assign a Project to a Team	So that each Team has a project to work on	Team Management	1
3	Student	I want to upload project documents to the Lifecycle server	So that my team members and administrator can view them	Document Management	1
4	Student	I want to see recent git commits to for the code of my teams term project	So that I can stay updated on the work that is being done for my team's Capstone project	Progress Tracking	3
5	Administrator	I want to be able to view students submissions and approve them for upload	So that I can ensure that submissions are relevant and are correct	Submission Review	1
6	Administrator	I want to see diagrams and documentation from each team provided.	So that I can understand where the project is going and what track the team is on.	Submission Review	1
7	Administrator	I want to be able to assign permissions on certain viewing capabilities for previously submitted Team Projects	So that I can ensure that current Capstone teams are using previous Capstone projects correctly and effectively to complete their own project	Access Control	2
8	Student	I want to be able to receive a confirmation of when my submission has been approved and uploaded	So that I know my submission was accepted and I do not need to make changes	Notifications	2
9	Administrator	I want to be able to view all team projects	So that I can monitor the progress of all projects	Progress Tracking	1
10	Student	I want to be able to update the status of my team's current Capstone project	So that I can inform the administrator of how my teams project is going	Notifications	2

11	Student	I want to be able to Edit documents on the Lifecycle Server within my team's project	So that I can manage and make changes to the documents to help my team	Document Management	1
12	Administrator	I want to be able to assign roles within my student teams.	So that I can keep track of what each student's responsibilities are within their team.	Team Management	1
13	Administrator	I want to be able to be able to remove projects or hide them from view (archive)	So that when projects become obsolete or are no longer needed	Document Management	3
14	Student	I want to see timestamps of when documents or code in my Capstone project has been edited	So I can see when my Team members are working on our project and what they changed.	Document Management	3
15	Student	I want to be able to receive feedback on project submissions	So I have an understanding of what changes and edits need to be made	Progress Tracking	2
16	Administrator	I want to be able to view submissions from teams that need approval.	So that I don't hold up a project by not seeing a submission that needs to be approved.	Submission Review	1
17	Administrator	I want to be able to search for projects based on the student or the team	So that I can filter my searches more effectively when searching for entire Capstone projects	Search or Filter	2
18	Student	I want to have all of my diagrams and all of my coding files all in one place	So that I can keep all of my project's documentation in one place rather than spread over multiple places (Google Drive, GitHub, etc.)	Document Management	1
19	Administrator	I want to have all of my Capstone teams project documentation in one place	So that I can grade my Student's work more effectively and not have to track down different file types over multiple different sources (Google Drive, GitHub, etc.)	Document Management	1
20	Administrator	I want to be able to retrieve projects from archive and make them available	So that when certain projects are needed or become relevant they are able to be accessed	Search or Filter	3
21	Administrator	I want to be able to add and remove students from	So that if there are changes to a team, we can edit them in	Team Management	1

		a project and team.	this application.		
22	Student	I want to upload project documents to the Lifecycle server	So that I can work on my Team's Capstone project from anywhere	Document Management	1
23	Student	I want to be able to remove documents from my Project	So that unused documents are not taking up space and all current versions are being used for client deliverables	Document Management	1
24	Administrator	I want to be able to download Student project documents from the Lifecycle server	So I can view my Team's documents on my own computer and not have to have any members of the Team send me the document through other means	Document Management	1
25	Administrator	I want to be able to deny student submissions when needed and send them a notification.	So that students can go back into their documentation and code and edit it to the current goal.	Notifications	1
